MAIN FEATURES

CLIMATE CONTROLLED WORK STATION

The climate-controlled workspace in the Data Annihilator allows your clients to safely and effectively observe the shredding of their drives and digital media through multiple cameras. Operators have a large workstation with abundant 110 VAC power to run laptops, hand-held scanners, and printers.

- Cabin Controller for Easy Operation
- Multiple Auto Start Features
- Lockable Storage & Shelving System
- Heating & Air-Conditioning

EASY LOADING AND UNLOADING

The Data Annihilator is equipped with rear and side lifts for easy loading and unloading of bins and gaylords into payload compartment and workstation. This allows for a safer and more efficient operation.

- Rear Lift Gate for Easy Loading/Unloading of Gaylords
- Side Lift Gate for Easy Loading/Unloading of Collection Bins

UNTHA RS40 SHREDDER

The RS40 four-shaft shredder is capable of destroying hard drives, CDs, DVDs, and tapes as well as light electronics, including cell phones, PDAs, and laptop computers. The shredder features a built-in screen that allows the operator to vary the particle size to meet client security requirements.

- Electronic Shut-down for Unshreddable Items
- Quick Change Screen System
- Low Noise and Dust Generation
- High Torque Drive Handles Tough Materials

WOOD FLOOR PANELING

ROLL-UP DOOR

MULTIPLE ACCESS DOORS

CONTAINER COLLECTION SYSTEM

ROBUST GENERATOR

LOCKABLE STORAGE

WE EXPORT GLOBALLY
