SHRED SUPPLY, INC.
YOUR INDUSTRIAL SHREDDING SUPPLY COMPANY

WHAT IS REFURBISHMENT?

Full refurbishment of your shredding truck will include the replacement or repair of every component on your truck including the cab and chassis. Every component is thoroughly inspected for damage and replaced or repaired as needed. We are committed to delivering the highest quality on each component.

CUSTOMIZE YOUR PROJECT

Each refurbishment project will have different needs. We will work with you to come up with a refurbishment plan that fits your budget and adds years of service and value to your shredding vehicle.

HOW IT WORKS

STEP 1 INSPECTION & ASSESMENT

To find out what your project will require, we start with an evaluation of your needs through an open dialogue. This is followed by an on-site or off-site inspection of your shredding truck

STEP 2 PROJECT PROPOSAL

We will provide a proposal based on the assessment. It will be complete with several different options to suit your refurbishment needs. This will be revised until a suitable solution is agreed upon.

STEP 3 REFURBISHMENT

Each refurbishment project begins with a complete teardown and cleaning of components. The components are then repaired or replaced as needed and placed on a new cab and chassis.

STEP 4 FINAL TESTING AND INSPECTION

Either on-site or off-site, we will have a walk through with your team to show you the work that was performed and demonstrate the capabilities of the refurbished vehicle.

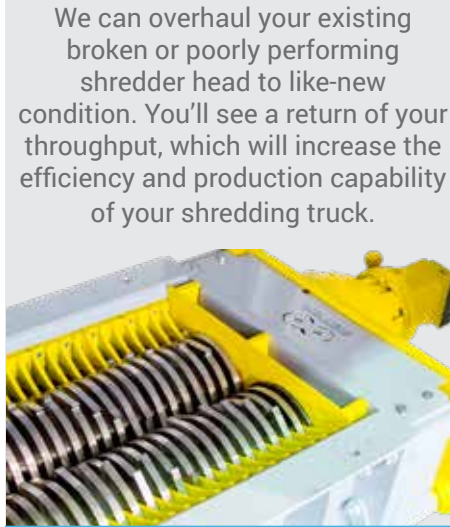

WHAT IT CAN INCLUDE

BODY SWAP

A “body swap” is a cost-effective solution where we take your existing van body and shredding equipment and place it on a new chassis. This keeps your overhead down and gives you the benefits of a new chassis warranty.

SHREDDER OVERHAUL

We can overhaul your existing broken or poorly performing shredder head to like-new condition. You'll see a return of your throughput, which will increase the efficiency and production capability of your shredding truck.

PTO REPAIR

While shredding, the Power Take-Off (PTO) unit puts considerable stress on the transmission, which can lead to significant damage if not dealt with. ShredSupply can repair or replace any of these crucial pieces of equipment.

CAN ALSO INCLUDE

- Control Panel Upgrade
- Refurb Active Unloading Floor
- Refurb Unloading System
- Refurb Lift Tip Carriage
- Refurb Van Body
- New Paint on All Components & Van Body
- Cold Weather Package
- New LED Lights
- New On-board Video Cameras & Monitors
- New Hydraulic System
- Replacement of Any Other Damaged or Aged Components

BENEFITS

SAVES MONEY

A fully refurbished shredding truck generally costs 20% less than purchasing brand new. That's \$40,000 in savings.

ADD YEARS OF SERVICE

With routine maintenance, you can expect your refurbished shredding truck to add years of service and extend its performance life.

AUGMENTS PURCHASING CYCLE

By choosing to refurbish your shredding truck, you are extending its service life and offsetting the need to purchase new.

WHY CHOOSE US

LEADING REFRUB COMPANY

We refurbish more shredding trucks than any other company in the industry.

SHREDDING TRUCK EXPERTS

When you work with us, you can rest assured your equipment is in the hands of experienced technicians.

PROJECT STATUS UPDATES

We will maintain a steady stream of communication to keep you updated on the current status of your shredding truck.

CUSTOMER SATISFACTION GUARANTEED

We will go to great lengths to ensure you are completely satisfied with your refurbished shredding truck.

WHAT OUR CUSTOMERS SAY

I feel like we just put a brand-new unit into service and yet we saved approximately \$50,000. Our drivers are happy, and our financials look good.
